

# The LEQVIO® Assist Patient Support Program

## A guiding hand in your treatment with Pr LEQVIO® (inclisiran injection)

Now that you've been prescribed LEQVIO®, you have access to all the support services offered with LEQVIO® Assist. This booklet is your guide to all the various ways we can support you through your treatment journey.

LEQVIO® is used in adults to further lower your LDL ("bad" cholesterol) levels. It is for patients who are currently taking a statin (a medicine used to treat high cholesterol), sometimes in combination with another cholesterol-lowering medicine.

LEQVIO® is used in addition to lifestyle changes, including diet in patients who have:

- Heterozygous familial hypercholesterolemia (HeFH) (an inherited genetic disorder that causes extremely high cholesterol levels), or
- Non-familial hypercholesterolemia (a condition that affects the way your body processes cholesterol) with atherosclerotic cardiovascular disease (a hardening of the arteries)

The effect of LEQVIO® on heart problems such as heart attacks, stroke, or death is not known.

## We are your guiding hand through your LEQVIO® treatment

The goal of LEQVIO® Assist is to support you during your LEQVIO® treatment. This means connecting you with an experienced team and sharing our expertise every step of the way.

### Keep us handy

For easy access to your LEQVIO® Assist team, save the wallet card below.

## Welcome to the LEQVIO® Assist Patient Support Program

At LEQVIO® Assist, we are a deeply devoted team with experience in patient support. As a patient-focused support program, we aim to keep your perspective at the heart of our thinking. We are here for you!

What we offer:

### Connected care

Your Assist Team (Clinical Coordinator and Reimbursement Specialist) guides you along the way.

### Coordinated support

We are driven to help you, handling LEQVIO® delivery, injection coordination and reminders.

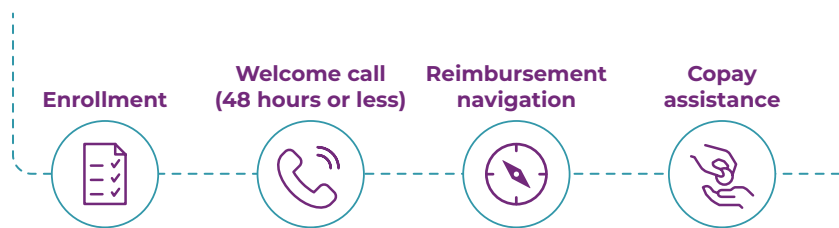

### Customized services

From pharmacy to clinic to your own home, we provide multiple options for where your LEQVIO® injection takes place.

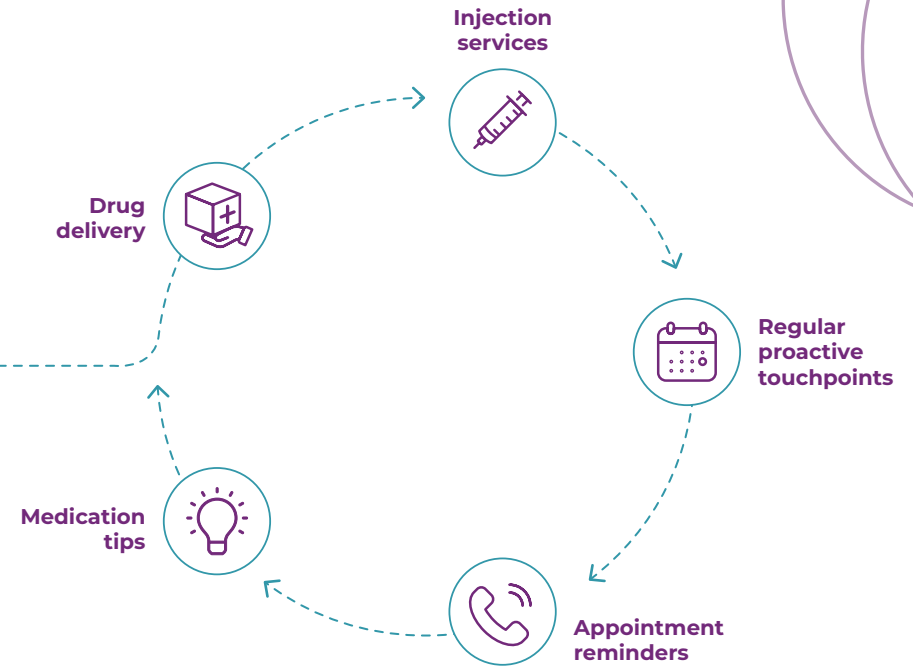

Support doesn't start and end at the doctor's office. We are proud to accompany you along the way – between doctor visits, and between LEQVIO® doses.

# The LEQVIO® Assist journey

Your Assist Team is here to support you along the way

**Remember:** you can reach out to your Assist Team any time you want!  
If you want to know more about our support services, all you have to do is call or email us.

## Meet your Assist Team

### Reimbursement Specialist

Your LEQVIO® Assist journey starts with the **Reimbursement Specialist**.

Your Reimbursement Specialist takes care of:

#### Welcome call

You will get a welcome call from your Reimbursement Specialist to introduce you to the program.

#### Reimbursement navigation

After your welcome call, we will work with your insurer to navigate drug reimbursement.

### Clinical Coordinator

Following your call with the Reimbursement Specialist, the **Clinical Coordinator** will become your main point of contact.

Your Clinical Coordinator takes care of:

#### Injection location and LEQVIO® delivery

Your Clinical Coordinator will help find an injection location that's appropriate for you, and handle the scheduling and delivery for every injection.

#### Injection reminders

Your Clinical Coordinator can provide reminders of upcoming injection appointments.

#### Follow-up calls

You'll get periodic calls from your Clinical Coordinator to follow up with you and provide tips for keeping track of your treatment.

# We aim to support you during your treatment journey

Following a treatment plan can be challenging at times, but LEQVIO® Assist is here to help.

## Customizable injection location

With the help of your Clinical Coordinator, injection appointments can be set up at a location that is suitable for you. Here's how it works.

**Step 1: Your Clinical Coordinator calls you to set up an injection appointment.**

**Step 2: Your Clinical Coordinator provides a list of options.** Locations can include pharmacies near you as well as specialized clinics. If you want to receive your injection at home, your Clinical Coordinator can arrange that as well.

**Step 3: Choose the option that's suitable for you.**

**Step 4: Your Clinical Coordinator arranges your injection.** They will set up an appointment for your injection and ensure LEQVIO® is delivered to your location of choice.

LEQVIO® is always administered subcutaneously by a healthcare professional.

## Your treatment schedule

The initial and second injections are given 3 months apart; subsequent doses are given every six months.

Your Clinical Coordinator keeps track of the following for you:

- ✓ They schedule injection appointments and coordinate LEQVIO® delivery every time.
- ✓ They will proactively call to remind you of injection appointments and provide medication tips.
- ✓ They can also remind you about the importance of any lab testing your physician recommends during treatment.

**Remember:** we are here for you!

If you want to customize how often we follow up with you, let us know.
